

Network Engineering 2016 Exercises - Unit 2

1 Populate your LDAP directory

Populate your LDAP directory with the following organisations, departments and persons. Use the normal convention of determining the dn for an entity using the components of the domain name of the organisation, but place the organisations inside the dc=nodomain name space, so that you don't have to worry about creating additional databases in OpenLDAP which is non-trivial.

e.g., an organisation with the domainname fish.com would be inserted as dc=fish,dc=nodomain.

You only need the full domain names for the email addresses You should create a single LDIF file that can be imported using the **ldapadd** command.

1.1 Organisations

| Organisation Name | Internet Domain | Country |
|--------------------------|-------------------------------|--------------------------------|
| Premium Investments | premiuminvestments.com.aq | Australian Antarctic Territory |
| Jurassic Resources | jurassicresources.com.au | Australia |
| Jurassic Commercial Bank | jurassiccommercialbank.com.ki | Kiribati |
| Jurassic Embezzlers | jurassicembezzlers.com.aq | Australian Antarctic Territory |
| Industrial Exports | industrialexports.com.aq | Australian Antarctic Territory |

1.2 Departments

Where a department has a "Parent Department" this means you have to enclose that department in the named department. Departments should be represented as an ou with the *exactly* the same name as the department.

| Organisation Name | Department Name | Parent Department |
